

5 said blanket substantially uniformly and form a continuous resin
matrix within said blanket with adhesive outer surfaces, second
mixture distributing means disposed adjacent said first mixture
distributing means for applying a thin coating of a preselected
10 substantially immediately curing resin forming material over a
final surface, positioning means disposed adjacent said second
mixture distributing means for placement of a structure in a
preselected final configuration and advance said coated
15 matrix/blanket into a final configuration on said coated base
surface, said positioning means including a cantilevered
extendable arm assembly pivotally connected with said supporting
portion, elongated structure grasping means disposed on said arm
assembly, submersible guide means and mixture distributing means
20 disposed adjacent a free end of said arm assembly, pressure
applying means disposed adjacent said positioning means applying
pressure to said matrix/blanket to tightly affix said coated
matrix/blanket to said coated base surface; said control portion
including programmable memory means, coordinating means, sensing
means, actuating means, and circuitry transmitting signals from
25 said sensing means to said coordinating means for comparison with
said memory means and activation of said actuating means to form
and place a continuous structure into a preselected final
configuration while it is flexible and adhesive and form a water
impervious structure thereon.

REMARKS

30 Applicant's attorney wishes to thank the Examiner for the
helpful telephone interviews on March 16 and 18, 2004. As a
result, language of Claim 1 has been incorporated in Claim 12 to
define the invention more clearly. In view of the above, it is
submitted that the amended claims are in condition for acceptance.
The Examiner is encouraged to telephone the undersigned if
additional discussion is required. Clean copies of amended Claim
12 is enclosed.

35 Entry of the above amendment, acceptance of the amended
claims and allowance of the above application are respectfully
solicited.

Respectfully submitted,

Arthur L. Urban
